

AFEI Announces Winners of its 2010 Excellence in Enterprise Integration Awards

The Association for Enterprise Information (AFEI) is proud to announce the winners of its 2010 Excellence in Enterprise Integration Awards. The top Industry Award was awarded to Symetrics Industries, LLC, of Melbourne, Florida for their Truly Paperless Manufacturing Floor Project. The government submission selected to receive the top Government Award was the Persistent and Daily Distributed Mission Operations Training from the Distributed Training Operations Center (DTOC), Des Moines, Iowa. In addition, five government submissions were recognized with an Honorable Mention.

Arlington, VA (Vocus) October 22, 2010

The Association for Enterprise Information (AFEI) (<http://www.afei.org>) is proud to announce the winners of its 2010 Excellence in Enterprise Integration Awards. The top Industry Award was awarded to Symetrics Industries, LLC, of Melbourne, Florida for their Truly Paperless Manufacturing Floor Project. The government submission selected to receive the top Government Award was the Persistent and Daily Distributed Mission Operations Training from the Distributed Training Operations Center (DTOC), Des Moines, Iowa. The presentations will be made during lunch at AFEI's Emerging DoD Information Platforms Conference, (<http://www.afei.org/events/1A01/Pages/default.aspx>) December 14 in Alexandria, VA.

The selected organizations demonstrated, in the opinion of the judges, the best applications of technology and leadership to improve enterprise performance. Innovative approaches, quantifiable metrics, long-term strategic effect and measureable accomplishments were all clear attributes of the winning nominations.

Ms. Jo Manson, Manager of Strategic Communications for the US Army Program Director for Transportation Information Systems, was one of this year's judges and is a past award winner. "The Excellence in Enterprise Integration awards program is a great competition. Being a judge raised my level of awareness about the quality of the overall award nominations and the commitment by Industry and Government to bring innovative problem solving and emerging technologies to the forefront of their program's solutions," said Ms. Manson.

"AFEI is extremely proud of this awards program" said David Chesebrough, President of the association. "This year we received over 50 nominations. Reading through the submissions provides insight into the outstanding work being done in Government and industry. Many of these nominations were deserving of recognition."

About the Excellence in Enterprise Integration Award Program:

The purpose of the program is to recognize and reward the contributions and achievements of project teams that exemplify excellence in achieving integrated enterprises and are models of the best applications of technology and leadership to improve enterprise performance. (<http://afei.org/awardspro.cfm> (<http://afei.org/awardspro.cfm>))

About AFEI:

AFEI is an industry association dedicated to the advancement of the sharing, integration, management and protection of information across extended enterprises (people, process and technology), with a focus on national security and defense issues. AFEI (<http://www.afei.org> (<http://www.afei.org>)) is an affiliate subsidiary of the National Defense Industrial Association (NDIA) (<http://www.ndia.org> (<http://www.ndia.org>)), America's leading defense industry association promoting national security.

About the Emerging DoD Information Platforms Conference:

The Emerging Platforms Conference, December 14-15, 2010 at the Alexandria Mark Center, will highlight new technologies DoD is adopting. These platforms will build better systems and provide software that is faster and cheaper to support the military services. DoD is adopting development platforms to provide enterprise capabilities in agile, innovative ways. Additional details: (<http://www.afei.org> (<http://www.afei.org>))
