Symetrics Industries Receives Chamber of Commerce 2007 Best Business Award

Symetrics Industries, LLC announced today that it recently received the 2007 Best Business Award from the Melbourne-Palm Bay Area Chamber of Commerce. To qualify for the award, local for-profit businesses must have been in business in the area for a minimum of two years, and must be an active member in good standing of the Melbourne-Palm Bay Area Chamber of Commerce. Symetrics was nominated by a fellow Chamber member organization, and was judged on various criteria, including: company benefits, personnel practices, customer service, innovations developed and instituted, company growth, and civic/charitable and chamber involvement.

The award was presented by Chamber President and CEO Shannon Meyer at the Chamber's annual Gala. Ms. Meyer stated, "The Gala is extremely important for not only the Chamber as a fundraiser, but also as the opportunity for the business community to recognize strong business leaders. The winners of the Best Business Awards represent companies that have excelled in their field and contributed to the overall good of the community." Symetrics has been an active participant in numerous Chamber events throughout the year, has made significant contributions to local charities, and has sponsored fund raising events and educational foundations.

"This is a valuable and exciting award for our company," said Mitch Garner, President and CEO at Symetrics. "To be recognized by the Chamber of Commerce as a Best Business is quite gratifying, as it is a testimonial to our commitment to both our employees and the community. We have instituted a number of innovative programs to retain our highly valued employees, and this award shows that our efforts have been successful." Among other benefits, Symetrics has a fully matched 401K, a tuition reimbursement program, career enhancing seminars, and a family-like atmosphere.

Symetrics, an AS9100 and ISO-9001-2000 registered company, has been designing, manufacturing, testing and delivering high reliability electronic

assemblies and sophisticated EW and Communication systems of the highest quality to the DoD for over 45 years. They are the US Government's prime supplier of the AN/ALE-47 Countermeasure Dispenser System, and a full family of Improved Data Modems, including the IDM-304.
